Hey Jason, that's a good thought, but not at this stage of the game. Todd is our point person for all of the residents. They know and trust him. Also, since ODEQ is lead for all of the CI, it's best that they handle these.

thanks

Katrina,

Hey, I just talked to you and I was thinking if it's a meet and greet session, maybe I should be there. I may have to interact with the local residents later on and it would be nice to get to know them and them to know me. Especially since I'm part of the team residents may see more frequently in the future.

I don't think you need to worry with travel. We only need the fee covered. Just a meet and greet. No presentation.

Katrina,  
Can I plan to go to this meeting?  
Thanks

Good Day Everyone, we have a field schedule for the treatability study to evaluate the use of solidification/stabilization for treatment of the lead additive area. This is scheduled for the week of April 15 and is expected to last through Wednesday with most activity falling on Tuesday.

Todd and I will be available on Tuesday night from 530-700pm at the Bristow Library (times may be adjusted) for a meet and greet to talk about the site and the treatability process.

Concurrent with this work and planning, the development of the remedial investigation characterization report, the feasibility study (technology report), and the risk assessments (human and ecological) is underway.

As always, call either Todd (405-702-5136) or I with an questions, and thank you for your continued interest.
